

➡ **Peak Performance.**
Lower Ownership Costs.
Maximum Value.

Building success through integration

In today's networked world, the ability to work together is vital—and that applies to systems as well as people. The more integrated your systems, the more likely you are to achieve high-performance operation, maximum cost savings, and long-term value.

EMCOR can help.

EMCOR is the largest independent building-automation services provider in the United States. We combine advanced systems expertise, a sound understanding of today's facilities' requirements, and extensive experience in providing our clients with tightly integrated, centralized operational control. And our extensive experience crosses a broad spectrum of markets. The result? Facilities that perform consistently and efficiently, reduce energy consumption, and lower overall costs.

A single point of contact for reliable service, day or night.

EMCOR professionals design tailored systems and install reliable, top-line equipment that helps clients meet their business objectives. And whether you need routine maintenance or emergency service, EMCOR is your single point of contact for reliable solutions any time – day or night.

How does integration deliver exceptional value?

Systems engineered for smart operation: we provide expert engineering assistance to ensure that your systems have been carefully integrated for extraordinary reliability, energy efficiency, and economy.

Installed to deliver high performance: our skilled installation technicians are supported by highly experienced construction and engineering professionals who, together, ensure that your systems deliver continuous comfort, ongoing productivity, and long-term value.

Our expertise encompasses heating and air conditioning, temperature and humidity control, lighting, card access, closed-circuit television (CCTV), security and surveillance, and a host of other complex, critical systems.

The performance you expect is the performance you get: we provide professional commissioning services and reports on a regular basis to ensure that your systems are running at peak performance.

Continuous system monitoring: through consistent monitoring, we can identify issues and resolve them before they become problems, so that your facilities perform reliably and optimally.

A passion for safety and quality: Our superior client care starts with a culture of safety and ends with a dedication to quality. By systematically listening to our customers' concerns and responding effectively and, above all, safely, we provide dependable, quality service that enables our clients to meet day-to-day challenges and achieve their business objectives.

EMCOR is brand neutral, which means we'll provide objective advice that helps you select the components and technologies that are right for the particular needs of your business.

EMCOR designs, installs, commissions, operates, and maintains the following building automation brands:

- American Auto-matrix Automated Logic (ALC)**
- Carrier CCN**

 - Excel 5000
 - WEBs AX
 - Tridium
 - Trend
 - »Trend IQ
 - Novar
 - »Logic One
 - »Opus
- Johnson Controls**
 - Metasys
 - Facility Explorer (FX)
- Liebert SiteScan**
- TAC/Schneider Electric**
 - Andover Controls
 - »Continuum
 - »Infinity
 - »256
 - Invensys Controls
 - »Robertshaw
 - »Siebe Environmental Controls
 - »Barber-Coleman
 - Vista
 - CSI
- Ingersoll Rand**
 - Trane
 - »Summit
 - »Tracer
- KMC BACnet**

OUR SERVICES:

Engineering

- Automation
- Control system design
- Card access security/ CCTV design
- Technical support
- Voice/data design

Maintenance and repairs

- 24-hour on call

Project management

- Administrative support
- Estimating

Start-up/Commissioning

- “As-built” documentation
- Field verification of point-to-point
- Functional performance testing
- Owners testing

Construction

- Control panel shop/UL-listed
- Field construction support

OUR MARKETS:

- Biotech/Healthcare
- Commercial
- Education
- Entertainment/Hospitality
- Financial Services
- Industrial/Refinery Services
- Public/Government
- Technology
- Transportation
